

APPLICATION LETTER

From Tadesse Worku Sete

Date: 06/02/2025

Phone: - 0954175245

Email: tadeactor@gmail.com

Dear sir /madam

Currently, I am working at Goh Betoch Bank, where I have honed my skills application customization, in-house project development, API integration, and database administration, which I believe aligns well with the requirements of this position.

I am currently working on a mobile application backend portal to ensure clear and efficient code. Additionally, I successfully completed the frontend development of a foreign currency allocation management project using Next.js. I also have experience with the CQRS pattern and Clean Architecture, which enhances my ability to design scalable and maintainable applications.

I have a strong ability to understand and develop diverse applications, utilizing REST and SOAP services, as well as TWS/IRIS exposed APIs. My experience with Spring Boot and next.js complements my skill set, enabling me to contribute effectively to both backend and frontend development.

I am passionate about leveraging technology to solve complex problems and improve user experiences. I believe that your organization commitment to innovation and excellence aligns perfectly with my own professional values and aspirations. My strong work ethic and dedication to continuous learning will make me a valuable asset to your team.

Thank you for considering my application. I am excited about the opportunity to contribute to your organizations success and would welcome the chance to discuss how my skills and experiences align with your goals.

With best regards,

Tadesse Worku Sete

Tadese Worku Sete

PERSONAL DETAILS

Date of Birth: 15/07/2000 G.C

Nationality: Ethiopian

Sex: Male

CONTACT

Email: tadeactor@gmail.com

CERTIFICATE OF Participation

This is to certify that

Tadese Worku Sete

His teams have Developed a project titled "Web based Pharmacy Information Management System" and actively Participated on Project Competition organized by WDU Computer Science Department Held on July 18/2022 to July 22/2022 and their project ranked 2nd among competent Projects.

Binyam T. (Msc)

Research & Project Coordinator

Tadese W. (Msc)

Head of Department

Statement of Achievement

Tadese worku

has successfully achieved student level credential for completing the Python Essentials 1 course, provided by Cisco Networking Academy in collaboration with OpenEDG Python Institute.

The graduate is able to proficiently:

- Design, develop, debug, execute, and refactor simple computer programs written in Python 3.
- Think algorithmically to analyze problems and implement them as computer processes.
- Use the syntax, semantics, and the most important elements of the Python Standard Library to write Python scripts and resolve typical implementation challenges.
- Understand the role of a programmer in the software development process.
- Attempt the qualification PCEP – Certified Entry-Level Python Programmer from OpenEDG Python Institute and continue their professional development at an intermediate level with Python Essentials 2.

Statement of Achievement

Tadese worku

has successfully achieved student level credential for completing the JavaScript Essentials 1 course, provided by Cisco Networking Academy in collaboration with OpenEDG JS Institute.

The graduate is able to proficiently:

- Understand the syntax of the core JavaScript language that allows for working with variables, operators, flow control, and functions.
- Understand the basics of the JavaScript data types system, distinguishing between primitive and complex types.
- Think algorithmically and can analyze a problem using a programmatic conceptual apparatus.
- Choose a data type adequate to the problem being solved and use suitable flow control means.
- Design, develop, and improve very simple JavaScript programs.
- Interpret and handle basic exceptions related to errors in program execution.
- Understand a programmer's work in the software development process and the role of fundamental development tools.
- Understand how a program is interpreted and executed in an actual computer environment, local or remote.
