Email: tadeactor@gmail.com

Dear sir /madam

Currently, I am working at Goh Betoch Bank, where I have honed my skills application customization, in-house project development, API integration, and database administration, which I believe aligns well with the requirements of this position.

I am currently working on a **mobile application backend portal** and **frontend react native** app to ensure clear and efficient code. Additionally, I successfully completed the frontend development of a **foreign currency allocation management** project using Next.js. I also have experience with the CQRS pattern and Clean Architecture, which enhances my ability to design scalable and maintainable applications.

I have a strong ability to understand and develop diverse applications, utilizing REST and SOAP services, as well as TWS/IRIS exposed APIs. My experience with Spring Boot and next.js complements my skill set, enabling me to contribute effectively to both backend and frontend development.

I am passionate about leveraging technology to solve complex problems and improve user experiences. I believe that your organization commitment to innovation and excellence aligns perfectly with my own professional values and aspirations. My strong work ethic and dedication to continuous learning will make me a valuable asset to your team.

Thank you for considering my application. I am excited about the opportunity to contribute to your organizations success and would welcome the chance to discuss how my skills and experiences align with your goals.

With best regards,

Tadese Worku Sete

Tadese Worku Sete

PERSONAL DETAILS

Date of Birth: 15/07/2000 G.C

Nationality: Ethiopian
